## SUMMARY

Web Developer with over two years of deep experience in front-end and full-stack development. Built full web applications independently and contributed to numerous client projects. Founder of WebDevMM agency and now pursuing formal university education in South Korea. Self-motivated learner with a passion for modern technologies and clean, scalable code.

## WORK EXPERIENCE

**WebDevMM—Myanmar/Online (Founder & WebDeveloper )** May 2024 - Present

- Founded and run a solo web development agency, delivering websites and web applications to global clients.
- Designed and implemented custom websites including eCommerce platforms using React, Firebase, and WordPress.
- Built UI/UX designs in Figma and translated them into responsive front-end layouts with Tailwind CSS.
- Managed entire project lifecycle independently: design, development, deployment, and client communication.

**Website Development Agency — Client-Based Work (Junior Web Developer)**  
**Jan 2024 - Jun 2025**

- Collaborated with agency team to deliver high-quality websites for multiple clients.
- Focused on front-end development using React.js, Tailwind CSS, and integrated Firebase for back-end services.
- Contributed to eCommerce and portfolio websites with pixel-perfect implementations.

## EDUCATION

Korea University — Seoul, South Korea  
Bachelor's Degree (Expected) | Starting September 2025

Currently pursuing higher education in South Korea, where I am gaining exposure to new perspectives and opportunities in technology and innovation.  
**Self-taught:** Completed 3+ years of online study through YouTube, Udemy, FreeCodeCamp, etc.

## PROJECTS

- **E-Commerce Websites:** Developed multiple fully functional online stores with shopping cart, payment, and admin systems.
- **Web Applications:** Built apps with real-time databases and authentication using Firebase and React.
- **Client Portfolios & Business Sites:** Delivered custom-tailored WordPress and static websites.
